

Tired of redoing the whole roof? Try:

Able's Ponding Water

SKU	Category	Material	Size	Base	Mesh	Height	Desc	Price
6190	Drain	26ga Galvanized	1½"	16x16"	6x6"	4¼"	Seamless	\$ 15.00
6190-T	Drain	TPO/PVC	1½"	16x16"	6x6"	4¼"	Seamless	\$ 30.00

As we all know, "Ponding" water in low lying areas can ruin the integrity of any flat roof system. So we at Able Sheet Metal have developed a simple and efficient drain to rid the problem without resloping or repitching the existing system. Simply establish the lowest point of such an area by monitoring the receding excess drainage and cut a 5" round whole in the roof. Roof in and pip to desired location using 1½" ABS. Simple, effective and affordable.

Available in TPO/PVC!
